Activating/deactivating
① Switches on with the current speed or calls up the last set speed
② Deactivates Active Distance Assist DISTRONIC

Changing the speed
③ Increases the speed or stores the current speed
④ Decreases the speed or stores the current speed
⑤ Increases the specified minimum distance
⑥ Reduces the specified minimum distance

Active Distance Assist DISTRONIC maintains a constant speed which has been stored. The lowest speed that can be set is 20 mph (30 km/h).

You can change the set speed:

▶ **1 mph (1 km/h) step:** Briefly press the lever up or down.
▶ **5 mph (10 km/h) step:** Press the lever up or down past the pressure point.

When Active Distance Pilot DISTRONIC is activated, one or two segments in the set speed range light up in the speedometer.
Using the controller on the DISTRONIC lever, you can change the specified minimum distance to the vehicle in front. The specified minimum distance depends on the currently driven speed.

Note that your vehicle may not be equipped with all features described.

Adjusting automatic climate control
You can adjust climate control using the buttons on control panel ①.
If you change any settings, the lower edge of display ② briefly shows the current settings of climate control.

Climate control control panel
